OVERVIEW OF INFORMATION TECHNOLOGY

The Information Technology (IT) department at UniSC is a pivotal element in the university's pursuit of academic and research excellence. Digital transformation and IT are vital in supporting UniSC's goal to become Australia's premier regional university in Australia. With a focus on enhancing teaching, learning, and research, the department features a robust technological infrastructure and a dedication to innovative strategies. Engaging closely with the UniSC community, IT provides essential technology services while proactively seeking new opportunities. This approach enables/supports IT to serve as a strategic business partner, significantly contributing to the institution's progress.

IT aids staff and students in their academic and professional pursuits through outstanding client services, efficient project management, and state-of-the-art applications and cloud infrastructure. The department is dedicated to safeguarding digital assets and promoting a secure online environment. By keeping innovation front-of-mind, IT ensures that UniSC is at the forefront of technological advancement in the educational sector.

ABOUT ENGAGEMENT & TRANSFORMATION SERVICES

One of our primary client-facing teams interacting with new demands. This set of services focus on business partnership, solutioning with the business to solve complex business problems, and helping our UniSC community to keep up to date with technology. It includes Enterprise Architecture, Business Analysis and Process Management, Portfolio & Project Management, Strategic Initiative Delivery, Shaping and Estimating works, Delivery Lifecycle, Business Agility coaching, Definition and Governance of the Portfolio Management Office (PMO) – streamlining IT practices and exploring emerging technologies such as AI to better understand how UniSC can leverage these.

Engagement & Transformation Services consists of two teams:

- Engagement & Innovation Services – partnering closely with the business, this team is responsible for the IT architecture and its practices. This team leads innovation strategies in e-Research and other specialist digital technologies and is responsible for the transition of specialist advanced services into operation across the University
- Program Delivery – responsible for portfolio and project risk, maintaining quality and project performance objectives and ensuring appropriate organisational change management is incorporated into projects to facilitate the effective adoption of project objectives

PRIMARY OBJECTIVES OF THE POSITION

1. To enable delivery of the University's strategic plan by establishing an enterprise-wide view of the business, processes and capabilities and aligning these with fit-for-purpose products, services and resources
2. Identify gaps, options and design solutions to mitigate the impact of change and risk whilst addressing business requirements to enable continuous improvement
3. Develop business relationships and identify key stakeholders across all portfolios to gain support and trust whilst developing Information Technology strategies, roadmaps, and solutions, that match the strategic appetite and constraints of the business
4. Communicate and demonstrate the value of enterprise architecture services. Measure and convey the value proposition of Enterprise Architecture to all stakeholders

NATURE AND SCOPE OF POSITION

Under broad direction of the Manager, Engagement and Innovation Services, the Senior Enterprise Architect will develop an understanding of the strategy, business capabilities, processes, information and technology requirements across the different University portfolios to enable transformative change and identify associated impacts and risks efficiently.

The role supports the delivery of business outcomes by working with stakeholders across the organisation to identify business capability requirements in relation to current and future business objectives. The role will identify opportunities to address gaps using existing investments wherever possible and investigate opportunities to rationalise and consolidate technologies and applications to reduce cost and complexity. The Senior Enterprise Architect will develop roadmaps and utilise the enterprise architecture framework and methodology to identify and communicate dependencies across initiatives, business areas and technologies.

University of the Sunshine Coast
Australia

ACCOUNTABILTIES OF THE POSITION

1. Drive and facilitate discussions with IT Business Partners and key stakeholders and senior leaders to identify business capability requirements in relation to current and future business objectives
2. Develop an understanding of the current state and maturity of the business capabilities and manage the essential transformations required to continually increase maturity in alignment with strategic goals
3. Using business process modelling, identify and define the strategic functional processes to optimise workflow and integrations between the different University entities
4. Streamline the application and technical portfolios for optimal performance by rationalising, consolidating, and decommissioning duplicate services and costs
5. Collaborate with the other IT teams to understand and map data interdependencies across the Universities digital landscape
6. Collaborate with technical teams within the IT department and conceptualise the technical vision to address business requirements across the University through the design, implementation and ongoing support of technical architectures whilst considering data, integration, and testing requirements
7. Configure, manage, and maintain LeanIX, the Universities Enterprise Architecture platform
8. Develop, manage and improve the Enterprise Architecture framework with principles, guidelines and processes designed to enable decision-making and allow for digital transformation and the rapid development and implementation of new solutions and enhancements
9. Prepare Digital Initiative Briefs (DIB) and undertake impact assessments for initiatives
10. Participate and contribute to IT Governance through undertaking Enterprise Architecture assurance and assessment
11. Contribute to a positive and safe work environment for you and others by modelling and promoting conduct that is culturally capable, inclusive, respectful, and ethical

KNOWLEDGE SKILLS AND EXPERIENCE NECESSARY

Applicants need to demonstrate they meet the following **Selection Criteria**:

1. Hold a relevant postgraduate degree and extensive relevant experience, or an equivalent combination of extensive specialist experience and/or education/training within an Enterprise Architecture environment, ideally gained in the higher education sector
2. Extensive experience and highly developed analytical skills, ideally gained in a higher education environment with knowledge of student information systems, research management systems and enterprise resource planning systems

3. Deep technical architecture experience and expertise designing, implementing and supporting Microsoft technologies in a hybrid environment consisting of both cloud and on-premise services
4. Excellent time management and work prioritisation skills, with the ability to manage multiple ongoing tasks with competing priorities
5. Strong project management skills including the ability to manage competing resources and priorities
6. Highly knowledgeable in the architecture of applications within Windows and Linux server environments, and knowledge of application technologies that support both web and “thick client”
7. High level communication and interpersonal skills, a collaborative mindset with the capability to negotiate and gain cooperation from stakeholders of varying technical competence and seniority and able to translate ideas, concepts and information into written and verbal form
8. Proven experience developing strategic plans and roadmaps for a large and complex organisation
9. Knowledge and experience mapping business capabilities to better align with technology
10. A sound understanding of the relevant legislation, statutory, compliance and cybersecurity requirements impacting the higher education sectors within the Australian University context
11. Experience and knowledge of guidelines, best practices and operating principles in alignment with frameworks and methodologies including but not limited to ITIL 4.0, COBIT, NIST CSF, Agile, TOGAF, PRINCE2, DEVOPS, Six Sigma, etc

University of the Sunshine Coast Australia

SKILLS FRAMEWORK FOR THE INFORMATION AGE (SFIA)

It is expected that applicants can demonstrate they can operate at the level of responsibility for the key SFIA skills defined below:

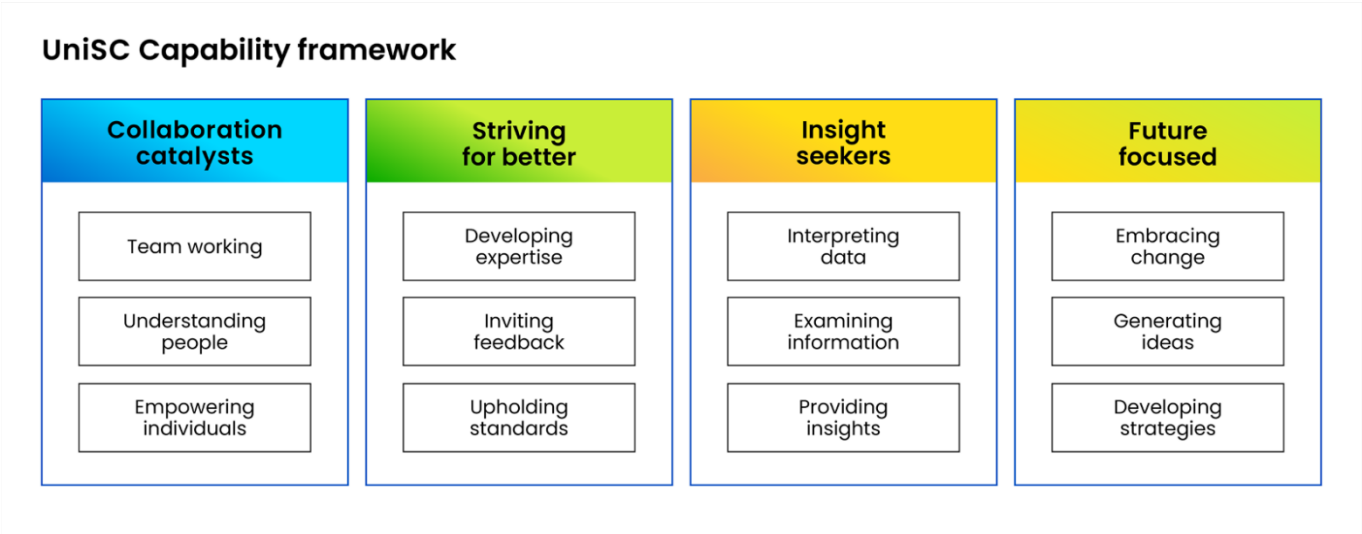
SFIA Level	Level Definition	SFIA Skills
7	Set strategy, inspire, mobilise	None
6	Initiate, influence	Requirements Definition & Management (REQM);
5	Ensure, Advise	Strategic Planning (ITSP); Innovation (INOV); Enterprise & Business Architecture (STLP); Feasibility Assessment (FEAS); Organisational Capability Development (OCDV); Benefits Management (BENM); Systems Design (DESN); Software Design (SWDN); Network Design (NTDS); Systems Integration & Build (SINT); Stakeholder Relationship Management (RLMT)
4	Enable	Information Management (IRMG); Emerging Technology Monitoring (EMRG); Information Security (SCTY); Specialist Advice (TECH); Business Situation Analysis (BUSA); Organisation Design & Implementation (ORDI); Data Management (DATM); Data Modelling & Design (DTAN); Organisational Facilitation (OFCL); Workforce Planning (WFPL);

UniSC has a Capability Framework that outlines the core capabilities for being a valued contributor to our vision of becoming Australia's premier regional University. The capabilities support this ambitious agenda and underpin our people practices from recruitment and onboarding to performance, development and career progression.

The Capability Framework is an expression of who we are at UniSC, highlighting the behaviours and skills that bring us together, working towards collective goals and the kind of community we aspire to be in an ever-evolving environment.

Our Capability Framework is designed to be a comprehensive guide to the behaviours and skills that are valued across our organisation and is applicable to all employees. The framework also recognises that not all roles are

equal, and therefore neither are the competencies required to be demonstrated in them. Further information on the framework and the defined levels of leadership for roles will be provided upon commencement.



Additionally, in accordance with UniSC's Staff Code of Conduct – Governing Policy, all staff are expected to display professional behaviour, communicate respectfully, and perform their duties responsibly.

A position description is not intended to limit the scope of a position but to highlight the key aspects of the position. The requirements of the position may be altered to meet the changing operational needs of UniSC.

UniSC is committed to creating a work and study environment that values diversity, facilitates equitable access and full participation.
